 FEMALE

## Temporary Service Policy for Standard Connections

---

Temporary Service is a separate classification of water service made available for use other than typical continuous standard service for domestic needs. There can be no residency at the property. This interim designation is generally for low-flow needs to accommodate construction or cleaning in preparation of occupancy; also, for testing water and utility facilities, plumbing fixtures, etc. Usage may not exceed 1,000 gallons in a month. "Temporary" anticipates a short duration with the objective of soon converting the account to "standard" service, at which time, standard service fees per District Service Policy will apply. The applicant must call the District to disconnect service.

Certain hazards are more likely to occur in unoccupied structures. Risks such as theft of service, leakage, cross-connection, or water damage can become potentially catastrophic to responsible parties. Therefore, the District may disconnect temporary service at will and without notice to avoid liability. The District determines when and how long this classification is appropriate to exist.

Normal billing applies to temporary service accounts. Any outstanding balance due is readily transferable (without cost) to a permanent service account in the name of the undersigned and subject to the terms and conditions of the District Service Policy.

An activation fee of \$50 is required at the time of application.

**THE UNDERSIGNED ACKNOWLEDGES THEY UNDERSTAND THE TERMS AND CONDITIONS OF THIS AGREEMENT.**
